

Fact Sheet

ARK™ Levetiracetam II Assay

The ARK™ Levetiracetam II Assay is a homogeneous enzyme immunoassay intended for the quantitative determination of levetiracetam in human serum or plasma on automated clinical chemistry analyzers. The measurements obtained are used in the monitoring of levetiracetam levels to help ensure appropriate therapy.

Assay Characteristics

- Fast and efficient routine monitoring for levetiracetam
- · Monoclonal antibody guarantees consistent lot-to-lot quality
- · Excellent precision, even in trough concentrations
- Liquid, ready-to-use reagents, calibrators, and controls
- · On-board stability for at least 60 days

Background

Levetiracetam (KEPPRA®) is an anti-convulsant drug approved for use as an adjunctive therapy in the treatment of epilepsy. It is also indicated as monotherapy in the treatment of partial-onset seizures with or without secondary generalization in adults and adolescents from 16 years of age with newly diagnosed epilepsy.

Reference ranges for seizure control have been proposed, encompassing concentrations from 6 to 46 μ g/mL (35 to 270 μ mol/L) for trough samples. Circulating levels of levetiracetam (serum blood concentrations) may be affected by compliance, renal function, pregnancy, drug-drug interactions, and timing of the sample draw. Furthermore, the clinical effect of these serum blood concentrations may be further altered by changes in disease progression and the addition or withdrawal of concomitant drugs that may interact pharmacodynamically with circulating levels of levetiracetam.

Properties of Levetiracetam

Dose Adults: 500 – 1500 mg oral; children & adolescents reduced dose;

dose adjustment for patients with renal dysfunction

Bioavailability ~ 100%

Peak Plasma Level approx. 1 hour after dosing

Plasma protein binding < 10%

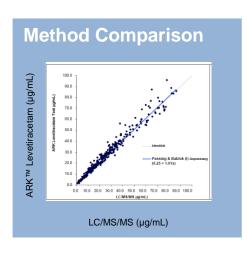

Elimination 66% are excreted unchanged in the urine

Metabolization Enzymatic hydrolysis of the acetamide group

Elimination half time 6 to 8 hours

Assay Precision

Sample	N	M (µg/ml)	Within-Run		Between Day		Total	
			SD	CV (%)	SD	CV (%)	SD	CV (%)
ARK™ Levetiracetam								
LOW	160	7.5	0.25	3.4	0.23	3.2	0.34	4.5
MID	160	29.4	0.85	2.9	0.83	2.8	1.08	3.7
HIGH	160	73.4	2.14	2.9	2.03	2.8	3.08	4.2
Human Serum								
LOW	160	6.9	0.26	3.8	0.22	3.1	0.33	4.8
MID	160	30.2	0.87	2.9	1.10	3.7	1.23	4.1
HIGH	160	75.5	2.19	2.9	2.35	3.1	3.31	4.4

Order Information

Product Description	Size	Order No.
ARK™ Levetiracetam Assay	28 mL R1 & 14 mL R2	5024-0001-00
ARK™ Levetiracetam Calibrator	1 x 4 mL & 5 x 2 mL	5024-0002-00
ARK™ Levetiracetam Control	6 x 4 mL	5024-0003-00
